LE HUU DUY HOANG

BACKEND DEVELOPMENT INTERN

Dob: February 14 , 2004
Gender: Male
Phone: 0866872591
Email: duyhoanggl98@gmail.com
Address: Thu Duc City , Ho Chi Minh City , Vietnam

OBJECTIVE

As a final - year Information Technology student specializing in Software Engineering , I have developed a solid background in **C #, .NET** technologies , **ASP.NET Core , WPF , Entity Framework , Blazor , SQL** . I am passionate about building robust backend systems and applying OOP principles to deliver efficient and scalable solutions . With strong problem - solving skills , adaptability , and a collaborative mindset , while continuously improving my technical expertise to grow into a proficient **.NET Backend Developer .**

EDUCATION

2022 - 2026

HUTECH University - Ho Chi Minh City University of Technology
Software Engineering
GPA : 3.61 / 4.0

SKILLS

Technical Skills

Backend : C # , ASP.NET Core , Entity Framework Core.

Frontend : WPF , Blazor , React , TailwindCSS.

Database : PostgreSQL , SQL Server , NoSQL (MongoDB).

Architecture : OOP, Layer Architecture, RESTful API , Redis , Serilog, Clean Architecture.

Tools & Others : GitHub, Postman,S3 Base, AI tools...

Soft Skills

Strong analytical and problem-solving skills, with a collaborative mindset, clear communication, adaptability to new technologies, and a responsible, professional work ethic.

PROJECTS

01/2026 - 03/2026

AgriLink — Smart Farm Management System

Describe :

A comprehensive agriculture management platform built with **ASP.NET Core** using Clean Architecture, supporting seasonal crop tracking, labor payroll, and integrated **MoMo** payments and many other rich features.

Github :

- **https://github.com/Elihoang/BE_AgriLink.git**

Team size : 1

Technologies : C#, .NET (ASP.NET Core API), Entity Framework Core, PostgreSQL, React, Shadcn UI and several libraries.

Responsibilities :

- Built a robust backend of 24+ RESTful APIs using Clean Architecture, ensuring business logic isolation.
- Implemented JWT authentication (access & refresh tokens) and secured passwords with BCrypt.
- Improved performance using Redis caching (Cache-Aside pattern) to reduce database load.
- Integrated third-party services: crop price scraping, Weather API, Cloudinary.
- Developed core modules: Blog/CMS, workforce management, payroll system.

07/2025 - 01/2026 **Website Question Bank (school project)**

Describe :

Developed a Web-based Question Bank System for universities, supporting **Word/PDF/.ezp** import–export with encrypted **files, LaTeX, images,** and **audio**. Implemented fast search and filtering to help lecturers efficiently build and manage large-scale exam question repositories.

Github :

- **https://github.com/sundayydev/be-question-bank.git**

Team size : 3

Technologies : C#, .NET (ASP.NET Core API), Entity Framework Core, PostgreSQL, DocX, React, Ant Design, Blazor and additional technologies.

Responsibilities :

- Built backend system using Layered Architecture and developed CRUD APIs for multiple question types (image, audio, LaTeX).
- Implemented JWT-based authentication, user management, and Excel import/export with reporting features.
- Secured exam data by compressing and encrypting files into custom .ezp format.
- Developed Blazor UI components and integrated features for exam generation and content management.
- Developed tools for LaTeX processing, image handling, and asset encryption.

HONORS & AWARDS

6/2024	First Prize - My First Website (Ho Chi Minh City University of Technology , HUTECH)
2023, 2024	Participated in IQ Math Competition (Ho Chi Minh City University of Technology , HUTECH)
2023, 2024	Participated in HD Bank Competition (AWS) (HUTECH)
2023, 2024, 2025, 2026	Outstanding Student(Ho Chi Minh City University of Technology, HUTECH)

INTERESTS

Passionate about reading and creative writing , especially short novels ; enjoy drawing , music , sports , anddiscovering new trends and innovations .
